CAPABILITIES

AlaFour provides modern full-stack software development with a focus on AI integration, cloud solutions, and secure systems.

- Custom .NET & React Applications
- AI-Powered Solutions
- AWS Cloud Development
- Secure Authentication Systems
- API Development & System Integration

PAST PERFORMANCE

Founder & Principal Engineer, Alafour LLC (June 2026 – Present)

- Building RequestFlow, a full-stack AI-powered application using React frontend and C#/.NET backend with AI integration.

Senior Software Engineer, Paylocity (May 2022 – January 2026)

- Enhanced enterprise expense reimbursement platform using React, .NET, AWS Lambda, and API Gateway.

Senior Full Stack Developer, TekSystems & Giant Eagle (2020 – 2022)

- Developed low-code platforms and system integrations using .NET and SQL Server.

Senior .NET Developer, Servpro (2015 – 2021)

- Led development of internal franchise readiness tracking system and compliance dashboards.

DIFFERENTIATORS

- Founder-led development with the owner serving as the Senior Software Engineer on every project
- Over 20 years of enterprise software development experience
- Specialized expertise in modern AWS cloud solutions, React/.NET development, and AI integration
- Small, agile company offering fast response times and direct access to the technical lead
- Strong focus on practical, production-ready solutions rather than theoretical approaches
